RI Images Cooling Loop

Left

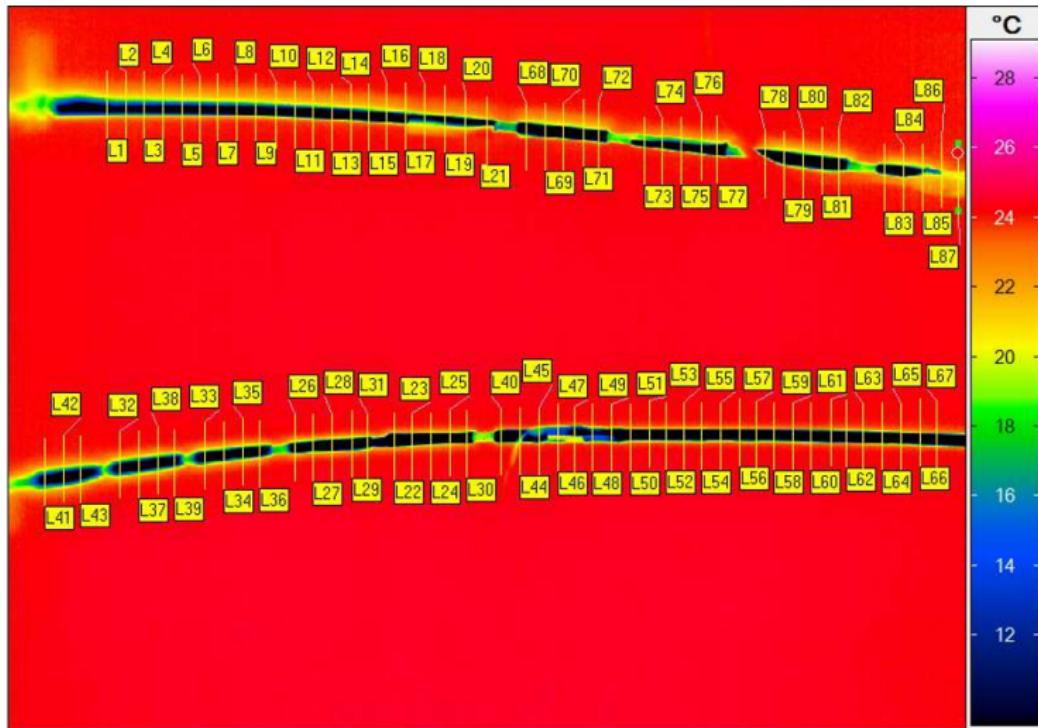

CentreLeft

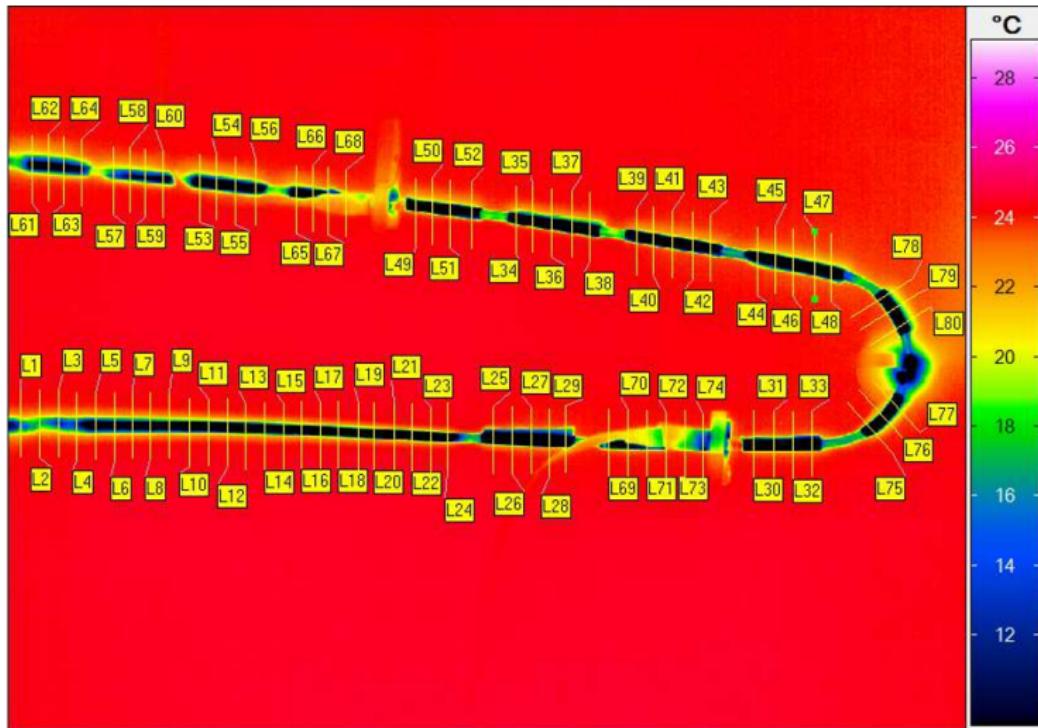

Note: I saved this image too early. There are ten labels, enumerated 41-50, missing. They are situated at the vertical lower pipe.

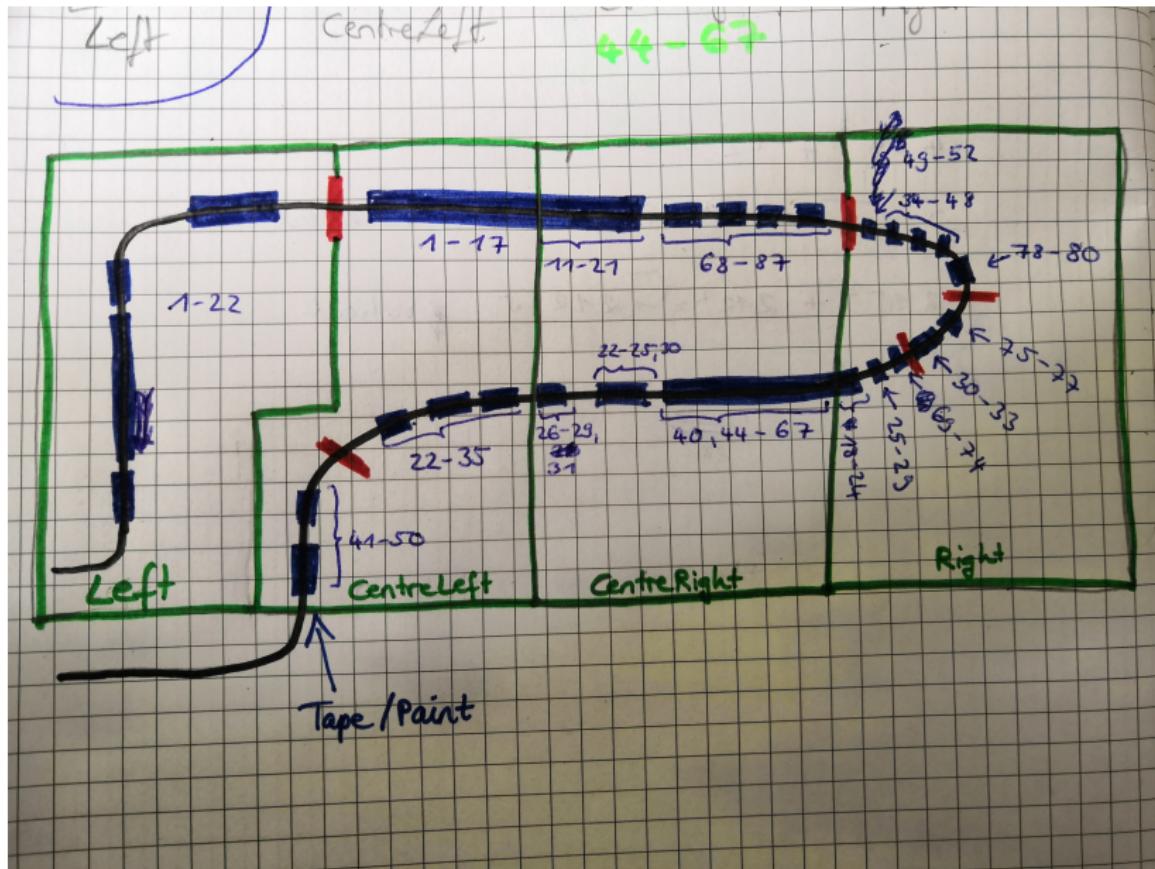

CentreRight

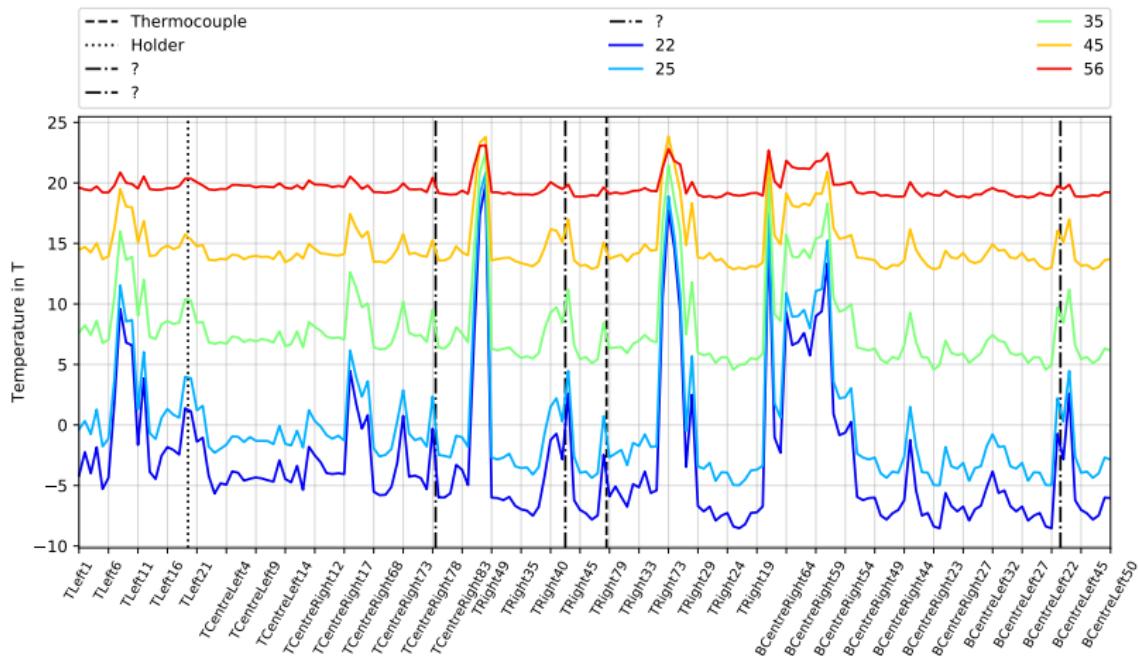

Right

Which labels were used?

Temperatures

From left to right, those are the measurement points starting at the upper pipe entry and ending at the lower pipe entry. The labels state T/B for top or bottom pipe, then the picture to which they refer, and the number of the label itself.
